

E-Gateway Regulations

Pakistan Engineering Council

7/18/2023

Mutual Understanding:

- The successful execution of projects on E-Gateway relies on establishing a strong mutual understanding between the client and the consultant.
- Both parties should engage in clear and open communication to ensure alignment of goals and expectations.
- Key project objectives, deliverables, timelines, and scope of work should be agreed upon with consensus.

Business Ethics:

- Consultants and clients using E-Gateway are expected to uphold the highest standards of business ethics throughout their collaboration.
- Honesty, integrity, and fairness should be integral to all business dealings conducted on the platform.
- Transparent pricing and disclosure of relevant information are essential to maintain ethical conduct.

Misbehavior and Fake Projects:

- Any form of misbehavior or inappropriate conduct during project interactions is strictly prohibited.
- Submissions of fake projects, false information, or misrepresentation of credentials are not tolerated.
- PEC will take immediate and appropriate legal action against any party found in violation of these regulations.

National and International Business Laws:

- All projects facilitated through E-Gateway are subject to applicable national and international business laws and regulations.
- Both consultants and clients are responsible for complying with relevant legal requirements.
- PEC will collaborate with legal authorities to ensure adherence to the law and protect the interests of all stakeholders.
